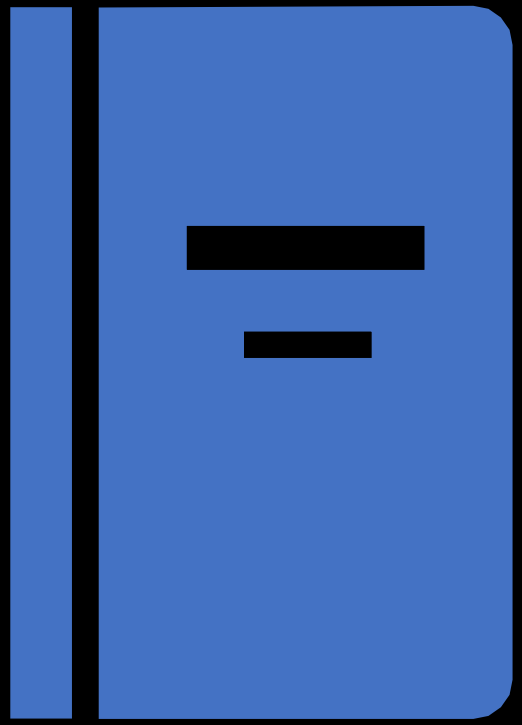
Deliverables – Portfolio

Portfolio

You will choose one option: 1 or 2:

1. Use the materials you developed along this course to create a portfolio to advertise your work.
2. Create a collection that will help you to develop a comprehensive portfolio in the future. You will collect portfolios and carefully list their strengths and weakness, and how those can inspire your own portfolio. (what would work or not for you?)



Requirements

You will choose an option and submit a pdf.

There, you will:

1. Provide a link to your portfolio or collection;
2. Explain what you did;
3. Include a paragraph that explains how this activity can be used to inspire your future endeavors.
